• Choose an image from: - Built-in collection - Remote collection • Set color intensity • Set transparency • Set hue and saturation • Apply filters • Set a border • Reverse background change • Apply watermark • Adjust contrast • Apply color effects • Set lock color • Set background color • Set image position and size ModernBack is a lightweight application built specifically for the Windows 8 operating system for helping users change the background image used in the Metro Start screen. Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to customize the Metro screen on the breeze, without having to go through installation steps. ModernBack sports a clean and simple interface that allows you to set up the dedicated parameters with minimum effort. The tool gives you the possibility to choose between different preset images or upload a picture from your computer, provided that the file format is JPG, PNG, GIF, BMP, TGA, TIF, DIB, or PBM. Additionally, all changes applied to the system can be reversed with just one click. Since it doesn't require much computer knowledge to work with ModernBack, even less experienced users can master the utility with minimum effort. During our testing we have noticed that the tool carries out a task very quickly, offers good image quality, and no errors showed up throughout the entire process. As it would be expected from such a small utility, it remains light on system resources, so it doesn't hamper computer performance, nor interfere with other programs' functionality. To sum things up, ModernBack offers a simple software solution when it comes to enhancing the Metro Start screen. It can be easily configured and installed by all types of users, regardless of their experience level. ModernBack is a lightweight application built specifically for the Windows 8 operating system for helping users change the background image used in the Metro Start screen. Shareme is a dedicated internet portal bringing users the latest shareware & freeware from the world's best Software Authors. Shareme allows Shareware & Freeware Authors to submit their latest wares, so you the user are able to download their latest software updates all the time, after they are released! Always visit Shareme for your software needs. We believe there is a new era of gaming that should be explored with everyone. Super Smash Bros is a fun and easy way to connect with new friends and experience a type of gameplay that is more personal than a tournament. In order to reach the widest audience, we believe it is necessary to host these events at public events with free admission. We encourage teams and players to attend the event and take part in the tournament. To help teams and players organize, we have created a new social media platform called Team Smash. We are giving the community an opportunity to play and practice as a team before the event and throughout the month of August. We are looking for new players to build teams, enter the tournament, and share their fun time together. It's possible for everyone to participate and we want to support you! The league will start after the big tournament and will run until the end of summer. So if you are looking to play one last time, the league will be the perfect way to do that! But wait, there is more! We've organized a camping trip for all participants. Camping is something that we haven't done in a long time and it's not something that we think about a lot, but we believe it is very important to give everyone the chance to experience this, just like the league. You can find more details about the camping trip on the facebook page: If you think this sounds exciting, we will see you at the tournament! Super Smash Bros. Melee If you want to find out more about the game, check out our tips page: The game is on it's

System Requirements:
